

## TODAY'S STANDARD

*Water Cycle Through Earth's Systems*

Develop a model to describe the cycling of water through Earth's systems driven by energy from the sun and the force of gravity.

TODAY'S LEARNING GOAL

Water Cycle Through Earth's Systems

**I** *can...*

build a model that  
shows the water  
cycle.

TODAY'S LEARNING GOAL

Water Cycle Through Earth's Systems

**I** *can...*

describe how the Sun  
and gravity drive the  
cycle.

TODAY'S LEARNING GOAL

*Water Cycle Through Earth's Systems*

**I** *can*...

use my model to trace  
one water molecule  
through Earth's systems.

## TODAY'S LEARNING GOALS

*Water Cycle Through Earth's Systems***I can...**

- build a model that shows the water cycle.
- describe how the Sun and gravity drive the cycle.
- use my model to trace one water molecule through Earth's systems.
