

## TODAY'S STANDARD

*Unequal Heating of Earth*

Develop and use a model to describe how unequal heating and rotation of the Earth cause patterns of atmospheric and oceanic circulation that determine regional climates.

TODAY'S LEARNING GOAL

*Unequal Heating of Earth*

**I** *can*...

build a model that  
shows how the Sun  
heats Earth unevenly.

TODAY'S LEARNING GOAL

*Unequal Heating of Earth*

**I** *can*...

describe how rotation  
and uneven heating drive  
wind and ocean currents.

TODAY'S LEARNING GOAL

*Unequal Heating of Earth*

**I** *can*...

use my model to explain  
why different regions  
have different climates.

## TODAY'S LEARNING GOALS

*Unequal Heating of Earth***I can...**

- build a model that shows how the Sun heats Earth unevenly.
- describe how rotation and uneven heating drive wind and ocean currents.
- use my model to explain why different regions have different climates.
