

TODAY'S STANDARD

Earth's Resource Distribution

Construct a scientific explanation based on evidence for how the uneven distributions of Earth's mineral, energy, and groundwater resources are the result of past and current geoscience processes.

TODAY'S LEARNING GOAL

Earth's Resource Distribution

I *can...*

describe why Earth's
resources are spread
out unevenly.

TODAY'S LEARNING GOAL

Earth's Resource Distribution

I *can...*

use evidence to explain
how geologic processes
put them where they are.

TODAY'S LEARNING GOAL

Earth's Resource Distribution

I *can*...

give examples of resources that formed in specific places for specific reasons.

TODAY'S LEARNING GOALS

*Earth's Resource Distribution***I can...**

- describe why Earth's resources are spread out unevenly.
- use evidence to explain how geologic processes put them where they are.
- give examples of resources that formed in specific places for specific reasons.
