

TODAY'S STANDARD

Body as System of Interacting Subsystems

Use argument supported by evidence for how the body is a system of interacting subsystems composed of groups of cells.

TODAY'S LEARNING GOAL

Body as System of Interacting Subsystems

I *can*...

describe how groups of cells form tissues, organs, and body systems.

TODAY'S LEARNING GOAL

Body as System of Interacting Subsystems

I *can*...

argue from evidence that the body is a system of smaller systems working together.

TODAY'S LEARNING GOAL

Body as System of Interacting Subsystems

I *can...*

use an example to show
what happens when one
system breaks down.

TODAY'S LEARNING GOALS

*Body as System of Interacting Subsystems***I can...**

- describe how groups of cells form tissues, organs, and body systems.
- argue from evidence that the body is a system of smaller systems working together.
- use an example to show what happens when one system breaks down.
