

TODAY'S STANDARD

Photosynthesis & Matter/Energy Cycling

Construct a scientific explanation based on evidence for the role of photosynthesis in the cycling of matter and flow of energy into and out of organisms.

TODAY'S LEARNING GOAL

Photosynthesis & Matter/Energy Cycling

I *can...*

explain how plants
use sunlight to make
their own food.

TODAY'S LEARNING GOAL

Photosynthesis & Matter/Energy Cycling

I *can...*

describe how
photosynthesis moves
matter and energy into
living things.

TODAY'S LEARNING GOAL

Photosynthesis & Matter/Energy Cycling

I *can...*

use a model to show
the inputs and outputs
of photosynthesis.

TODAY'S LEARNING GOALS

*Photosynthesis & Matter/Energy Cycling***I can...**

- explain how plants use sunlight to make their own food.
- describe how photosynthesis moves matter and energy into living things.
- use a model to show the inputs and outputs of photosynthesis.
