

## TODAY'S STANDARD

*Natural Selection & Trait Variation*

Construct an explanation based on evidence that describes how genetic variations of traits in a population increase some individuals' probability of surviving and reproducing in a specific environment.

TODAY'S LEARNING GOAL

*Natural Selection & Trait Variation*

**I** *can...*

describe how variation  
in a trait can help an  
individual survive.

TODAY'S LEARNING GOAL

*Natural Selection & Trait Variation*

**I** *can...*

explain how surviving  
individuals pass that  
trait to their offspring.

TODAY'S LEARNING GOAL

*Natural Selection & Trait Variation*

**I** *can...*

use evidence to argue  
how natural selection  
shapes a population.

## TODAY'S LEARNING GOALS

*Natural Selection & Trait Variation***I can...**

- describe how variation in a trait can help an individual survive.
- explain how surviving individuals pass that trait to their offspring.
- use evidence to argue how natural selection shapes a population.
