

## TODAY'S STANDARD

*Atoms & Molecular Structure*

Develop models to describe the atomic composition of simple molecules and extended structures.

## TODAY'S LEARNING GOAL

*Atoms & Molecular Structure*

# I *can*...

build a model that shows the atoms inside a simple molecule.

## TODAY'S LEARNING GOAL

*Atoms & Molecular Structure*

# I *can*...

compare a small molecule like water to a giant repeating structure like a crystal.

## TODAY'S LEARNING GOAL

*Atoms & Molecular Structure*

# I *can*...

use my model to explain  
what makes one substance  
different from another.

## TODAY'S LEARNING GOALS

*Atoms & Molecular Structure*

# I can...

- build a model that shows the atoms inside a simple molecule.
- compare a small molecule like water to a giant repeating structure like a crystal.
- use my model to explain what makes one substance different from another.
