

TODAY'S STANDARD

Ecological Relationships

Describe and analyze the relationships between organisms in an ecosystem, including symbiotic relationships such as mutualism, commensalism, and parasitism, as well as predator-prey interactions and competition.

TODAY'S LEARNING GOAL

Ecological Relationships

I *can*...

describe symbiotic relationships, including mutualism, commensalism, and parasitism.

TODAY'S LEARNING GOAL

Ecological Relationships

I *can*...

analyze predator-prey interactions and competition between species.

TODAY'S LEARNING GOAL

Ecological Relationships

I *can*...

use examples to show how relationships between organisms keep an ecosystem balanced.

TODAY'S LEARNING GOALS

*Ecological Relationships***I can...**

- describe symbiotic relationships, including mutualism, commensalism, and parasitism.
- analyze predator-prey interactions and competition between species.
- use examples to show how relationships between organisms keep an ecosystem balanced.
