

## TODAY'S STANDARD

*Variations & Survival*

Describe how variations within a species can affect the survival and reproduction of organisms within a population, resulting in traits that become more or less common over generations.

## TODAY'S LEARNING GOAL

*Variations & Survival*

# I *can*...

describe how variations within a species affect survival and reproduction.

## TODAY'S LEARNING GOAL

*Variations & Survival*

# I *can*...

explain why helpful traits become more common in a population over time.

## TODAY'S LEARNING GOAL

*Variations & Survival*

# I *can*...

give an example of a variation that helped or hurt a species' survival.

## TODAY'S LEARNING GOALS

*Variations & Survival***I can...**

- describe how variations within a species affect survival and reproduction.
- explain why helpful traits become more common in a population over time.
- give an example of a variation that helped or hurt a species' survival.
