

TODAY'S STANDARD

Matter & Kinetic Energy

Investigate and explain how the kinetic energy of particles in matter is related to temperature and state of matter, including solids, liquids, and gases.

TODAY'S LEARNING GOAL

Matter & Kinetic Energy

I *can*...

explain how the kinetic energy of particles connects to temperature.

TODAY'S LEARNING GOAL

Matter & Kinetic Energy

I *can*...

describe how particle motion changes between solids, liquids, and gases.

TODAY'S LEARNING GOAL

Matter & Kinetic Energy

I *can*...

predict what happens to particles when I heat or cool a substance.

TODAY'S LEARNING GOALS

*Matter & Kinetic Energy***I can...**

- explain how the kinetic energy of particles connects to temperature.
- describe how particle motion changes between solids, liquids, and gases.
- predict what happens to particles when I heat or cool a substance.
