

## TODAY'S STANDARD

*Forces in the Real-World*

Identify and describe the types of forces acting on everyday objects, including contact forces such as friction, normal, applied, and tension, and non-contact forces such as gravity, magnetic, and electric.

## TODAY'S LEARNING GOAL

*Forces in the Real-World*

# I can...

identify contact forces like friction, normal, applied, and tension acting on objects.

## TODAY'S LEARNING GOAL

*Forces in the Real-World*

# I can...

identify non-contact forces like gravity, magnetic, and electric forces.

## TODAY'S LEARNING GOAL

*Forces in the Real-World*

# I can...

describe the forces acting  
on an everyday object I  
can see.

## TODAY'S LEARNING GOALS

*Forces in the Real-World*

# I can...

- identify contact forces like friction, normal, applied, and tension acting on objects.
- identify non-contact forces like gravity, magnetic, and electric forces.
- describe the forces acting on an everyday object I can see.
