

TODAY'S STANDARD

Compare & Contrast Energies

Compare and contrast potential and kinetic energy in different systems, including the energy stored in an object's position and the energy of an object in motion.

TODAY'S LEARNING GOAL

Compare & Contrast Energies

I can...

compare and contrast
potential energy with
kinetic energy.

TODAY'S LEARNING GOAL

Compare & Contrast Energies

I can...

identify when an object's energy is stored versus when it's moving.

TODAY'S LEARNING GOAL

Compare & Contrast Energies

I can...

give examples of how energy switches between potential and kinetic in a system.

TODAY'S LEARNING GOALS

*Compare & Contrast Energies***I can...**

- compare and contrast potential energy with kinetic energy.
- identify when an object's energy is stored versus when it's moving.
- give examples of how energy switches between potential and kinetic in a system.
