

TODAY'S STANDARD

Model Earth's Tilt & Seasons

Model and describe how the tilt of Earth on its axis, including the 23.5 degree angle, causes changes in the length of daylight and the angle of sunlight that produce the seasons.

TODAY'S LEARNING GOAL

Model Earth's Tilt & Seasons

I *can*...

model how Earth's 23.5 degree tilt causes the seasons.

TODAY'S LEARNING GOAL

Model Earth's Tilt & Seasons

I *can*...

explain how the tilt changes the length of daylight throughout the year.

TODAY'S LEARNING GOAL

Model Earth's Tilt & Seasons

I *can*...

describe how the angle of sunlight hitting Earth affects how warm a season feels.

TODAY'S LEARNING GOALS

*Model Earth's Tilt & Seasons***I can...**

- model how Earth's 23.5 degree tilt causes the seasons.
- explain how the tilt changes the length of daylight throughout the year.
- describe how the angle of sunlight hitting Earth affects how warm a season feels.
