

## TODAY'S STANDARD

*Tectonics & Geological Events*

Model and describe how plate motions at different types of boundaries cause major geological events, including earthquakes, volcanoes, mountain building, and the formation of ocean trenches.

## TODAY'S LEARNING GOAL

*Tectonics & Geological Events*

# I *can*...

model how plates move at convergent, divergent, and transform boundaries.

## TODAY'S LEARNING GOAL

*Tectonics & Geological Events*

# I *can*...

describe geological events like earthquakes, volcanoes, and mountain building at each boundary.

TODAY'S LEARNING GOAL

*Tectonics & Geological Events*

**I** *can...*

explain how ocean  
trenches form where  
plates meet.

## TODAY'S LEARNING GOALS

*Tectonics & Geological Events***I can...**

- model how plates move at convergent, divergent, and transform boundaries.
- describe geological events like earthquakes, volcanoes, and mountain building at each boundary.
- explain how ocean trenches form where plates meet.
