

TODAY'S STANDARD

Body Systems & Functions

Describe the function and interactions of major body systems in organisms, including the skeletal, muscular, nervous, respiratory, integumentary, circulatory, endocrine, digestive, immune, and urinary systems.

TODAY'S LEARNING GOAL

Body Systems & Functions

I *can*...

describe the function of major body systems, from skeletal to immune to urinary.

TODAY'S LEARNING GOAL

Body Systems & Functions

I *can*...

explain how two or more body systems work together to keep an organism alive.

TODAY'S LEARNING GOAL

Body Systems & Functions

I *can*...

give an example of what happens when one body system fails to do its job.

TODAY'S LEARNING GOALS

*Body Systems & Functions***I** *can...*

- describe the function of major body systems, from skeletal to immune to urinary.
- explain how two or more body systems work together to keep an organism alive.
- give an example of what happens when one body system fails to do its job.
