

TODAY'S STANDARD

Natural & Artificial Selection

Explain how natural and artificial selection can result in changes in populations over multiple generations, including the processes by which organisms with favorable traits survive, reproduce, and pass those traits to their offspring.

TODAY'S LEARNING GOAL

Natural & Artificial Selection

I *can*...

explain how natural selection changes populations across generations.

TODAY'S LEARNING GOAL

Natural & Artificial Selection

I *can*...

explain how artificial selection lets people choose which traits get passed on.

TODAY'S LEARNING GOAL

Natural & Artificial Selection

I *can*...

describe why organisms with helpful traits are more likely to survive and reproduce.

TODAY'S LEARNING GOALS

*Natural & Artificial Selection***I can...**

- explain how natural selection changes populations across generations.
- explain how artificial selection lets people choose which traits get passed on.
- describe why organisms with helpful traits are more likely to survive and reproduce.
